

FINDING NEMO ECOLOGY QUESTIONS

Year :

Released by:

Awards:

Main actors:

Identify as many biomes as you can in the first 10 minutes of film

Describe the relationship between clownfish and anemone. Who benefits from this relationship?

Why do clownfish have so many eggs? Does the relationship change from before to after the barracuda attack? .

In the school scene, check to see if there are specific interactions between species. tenantism, or others...

What type of adaptation do Marlin and Dory lack, that the fish at the bottom of the abyss does have? Have you seen any other adaptations?

What type of relationship do the "school of fishes" they ask for directions have?
